

[Malware Scan For Mac](#)

[Malware Scan For Mac](#)

Malware Protection is a rogue anti-spyware program that uses fake scan results and false security alerts to make you think you are infected.. It is promoted through the use of fake online malware MacOS has built-in antivirus/anti-malware protection, but if you want another means to determine if your Mac is 'infected' I would suggest that you try either Malwarebytes for Mac or EtreCheck as the means to do so.
